

Bavarian Rise

Competition entry

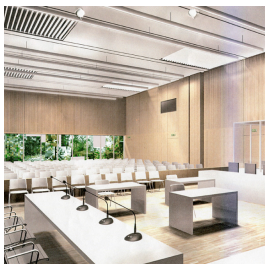

Details
Steel and steel cable
construction

Competition entry for the **Bavarian State Office for Statistics** Fürth (invitation from the State Building Office Nuremberg-Erlangen). The design refers to the population growth in Bavaria.

For the art-in-architecture measure, I proposed a via ferrata across the inner courtyard of the Bavarian State Office for Statistics which recreates the statistical curve of population growth in Bavaria over the last 200 years.
