

Eldorado: Time is money, money is gold

Competition entry

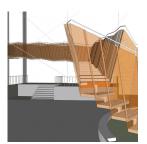

DetailsFacade gilding, information board (stainless steel engraved)

For the art-in-architecture competition of the **Munich Tax Campus** (1st construction phase) I proposed a partial gilding of the facade, whereby the available building sum (300,000 Euro) should clarify the principles of value, work, time and charges (unrealized).

The components necessary for the production of the work of art: Idea (design), material (gold), work (craftsmanship), tool (scaffolding) are illustrated both factually (by the amount of gold used) and abstractly (by means of a chart table), which should also display taxes.
